PROJECTS

Enabling trust and privacy preserving ekyc system using blockchain 🔗 | Jdbc, J2EE, (JSP, Servlet)

- In the era of digitalization, the need for efficient, secure, and privacy-conscious eKYC (Electronic Know Your Customer) systems is paramount.
- This project is dedicated to developing a robust and user-friendly eKYC solution using Java, Servlets, and JSP (JavaServer Pages) technologies, focusing on trust and privacy preservation.

Student Management System 🔗 | Jsp, Servlet, Adv Java, Collection Framework, html, Css, Bootstrap,

- While working on the student management project, I encountered multiple errors related to JDBC connections and servlets.
- However, I was able to successfully resolve these issues and move on to the next phase of the project.

CRUD Operations Using Jsp and Servlet 🔗 | MVC Pattern, Mysql Database, Front end languages

- I follow the Model-View-Controller (MVC) design pattern and adhere to industry coding standards.
- I use Github for version control and collaboration with my team.

Cloth Collection System 🔗 | Php, Mysql, Xampp, Html, Css

- As a team member in the project, my primary responsibility was to work on the MySQL database and make sure it is efficiently designed and structured.
- Alongside that, I also contributed to the development of the front-end using HTML, enhancing the user interface for better user experience.

EXTRACURRICULAR

Sports Events Management

SBPCOE

- Contributed to planning and executing various sports events, coordinating with teams, officials, and volunteers.
